

Organic Silicon G5

Imported from Ireland

-the only 'organic silica' that your body can absorb and assimilate effectively

Silica is a vital mineral - an essential element of all living matter. All humans have a need for this mineral element.

However, as our body decreases with age, our ability to assimilate this vital mineral declines significantly. The high absorption of silica in the body makes this product one of the most effective therapeutic remedies for 'silica deficiency' ailments and conditions.

For more information on this product, 'Organic Silicon G', refer to health articles in our website: www.cancernaturaltherapyfoundation.org
